Digital X-Rays are additional	first image	\$80
	each additional image	\$50

**Mileage** \$0.65/mile always billed from our closest office, unless a specific employee is requested from a remote office.

**Project Expenses** \$95 minimum, based on length of report.  
Includes project setup and administration, professional peer review, secretarial costs, printing, photographs, etc.

**\*Vehicle Mechanical Expert** From time to time, Donan Engineering employs qualified vehicle experts that may not be licensed professional engineers. However, such professionals have been deposed and testified – certified as experts in their areas of expertise.

**\*\*Residential Flat-Fee Investigations** Donan Engineering offers flat-fee pricing on some residential asphalt shingle studies. To qualify for flat-fee pricing studies must involve 1 hour or less of roundtrip travel time from our local office (Additional travel is billed at our standard time and mileage rates), the structure must be two stories or less, and the roof must be able to be walked. Flat-fee projects consist of a short-form report and 12 or less photos.

**\*\*\*Flat Fee Testing** \$320 flat fee studies are available on projects where the evidence is delivered to a Donan Engineering office. Evidence retrieval and on-site studies are available for an additional fee. Studies may exceed \$320 if destructive testing, materials laboratory equipment and/or analysis are required. However, \$320 will not be exceeded without customer approval. Please call for a specific project quote or more information.

**\*\*\*\*Infrared Camera** Donan Engineering offers infrared camera technology for the purpose of performing Electrical & Building Façade Surveys, as well as for Commercial Roofing Leak and Moisture Surveys. This technology is capable of detecting wet insulation, leaks, loose electrical connections, faulty wiring, overloaded circuits, blockages, refrigerant leaks, and much more. There is no additional charge for the use of this infrared technology and these projects will be charged based on Donan Engineering's standard time and travel rates.
